Front End Developer

Serhii Kushnir

Poland   +48 577 264 738   s1983kushnir@gmail.com   https://www.linkedin.com/in/serhiikushnir/   GitHub

As a front-end developer with strong technical experience in team projects, I reduced token usage in OpenAI API prompts, cutting costs by 20%. My attention to detail ensures adherence to technical requirements and pixel-perfect UIs. With an engineering background in teamwork and problem-solving, I aim to bring my skills to a new company for mutual success.

CAREER EXPERIENCE

Front End Developer Junfolio

September 2024 - Present

MarketPlace | GitHub [[Next.is, TS, Tailwind CSS, Redux]

Application Development: A platform that connects startups with collaborators to combine talent and expertise

Collaboration & Optimization: Refactored code, images with SVG sprites to reduce HTTP requests, improving page load times and application efficiency.

Components: User profile, forms, using library React-Hook-Form.

Full Stack Developer Reel-Reveal

January 2024 - Present

Reel-Reveal | GitHub [Next.js, React TS, Tailwind CSS, OpenAI API, MongoDB, TMDB]

Application Development: Contributed to building a responsive web app for movie discovery, using TMDB API and OpenAI API.

Collaboration & Optimization: Worked with a UX designer to create a user-friendly and pixel-perfect interface. I optimized the API integration, cutting token usage and costs by 20%.

MongoDB Integration: Set up MongoDB for efficient data storage.

Personalized Recommendations: Implemented an interactive quiz that utilizes the OpenAI API to generate tailored movie suggestions for users.

Senior Design Engineer Vericom

2013 - 2024, Kyiv, Ukraine

Designed, debugged, and managed the full production cycle of LED lighting devices. Constructed CNC machine tools for production use. Oversaw customer consultations and managed the entire production process.

PROJECTS

GoosTrack | GitHub [React, RTK Query, Node.js, Styled Component, Recharts]
Group project. Schedule planning app. Role: statistics page.

Filmoteka | GitHub [HTML, JS, SASS, Parcel, TUI pagination]
Individual project. An application for creating your own movie library.

SKILLS

- JavaScript
- TypeScript
- HTML, CSS
- React
- SASS, Styled Components, Tailwind
- Responsive design
- Git
- Node.js
- MongoDB

EDUCATION

GO IT
Full Stack Development
2022 - 2023

Certificate

NATIONAL AVIATION UNIVERSITY
MSc in Energy Engineering

LANGUAGES

Ukrainian - native

Rassian - native

English - B1
